Symbiosis International (Deemed University)

Soft Skill Session Report (2019-20)

Speaker: - Mr. Nitten Mahadik

Date : 17 January to 18 January 2020 (Friday-Saturday)

Time : Full day (9.00am to 5.00pm) both days

Topic: “Speaking with Impact”

Learning to be an effective, ethical public speaker is one of the most empowering, rewarding educational goals you can set for yourself. Learning to be an effective, ethical public speaker is one of the most empowering, rewarding educational goals you can set for yourself. Learning to be an effective, ethical public speaker is one of the most empowering, rewarding educational goals you can set for yourself. Even the best ideas are worthless and receive no credit if they cannot be shared effectively with others. Acquiring skills for effective oral public communication has been central to becoming an educated person from ancient times to the present.

Learning to be an effective, ethical public speaker is one of the most empowering, rewarding educational goals you can set for yourself. Even the best ideas are worthless and receive no credit if they cannot be shared effectively with others. Acquiring skills for effective oral public communication has been central to becoming an educated person from ancient times to the present.

In order to check our enthusiasm and presence of mind, the session started with a game. All the students were asked to stand in a circle and pass on the claps from one person to another saying a particular word with an eye contact to that person. Later on, we were asked to tell our individual stories for a duration of minute and a half.

Mr. Nitten Mahadik trained us for public speaking by explaining us the 3 key aspects which are body language, words and voice modulation to improve our fluency in speech. The main aspect in delivering a fluent speech is body language. He demonstrated us how body language can affect in winning the attention of audience. The second most important aspect is the voice modulation. He made us practice all the Devanagari alphabets with jaw movements in loud and twisted tongue twisters. It was indeed fun and refreshing to do those activities. He briefed the students with the key and the auxiliary aspects of public speaking, demonstrating how good story telling can be and how it can be used to change lives on a bigger perspective.

Mr. Nitten Mahadik made us realize that how bringing a story character into real life and enacting it can dramatically change the story telling and its massive impacts on the audience. The story becomes all the more meaningful when the audience feels connected and thoroughly

engaged. The session ended with all the participants narrating another story, but this time using all the key factors which we learnt throughout the workshop.

In this workshop the students demonstrated the ability to communicate in personal and professional contexts among diverse and varied audience. We learnt the art of fluent communication in synchronization with body language. Altogether this workshop was impactful, fun and overwhelmingly refreshing which turned out to be a stress reliever and a much needed break from the daily academics.
