1. LogIQ

Have you ever wondered what would happen if you were on a Quiz show on TV? Here's your chance to find out. The event is a fun twist to your regular quiz. There will be three rounds with questions based on the theme (science, technology, and statistics). So buckle up and get ready to challenge your mind!

Registration Link: <https://forms.gle/fKLwinrCXfLBQZ149>

3 hours

Individual

Feb, 28

3. Ignite

A product launch event for a team of 4 participants, each representing the following departments: Research and Development, Finance, Business Model Development, and Data Science. Each team will have to develop a solution to the given problem statement in the form of a product and a business model to execute the product.

Challenge yourself by developing a business model to market your product and present your solution to solve a real-world problem. Be your boss and IGNITE the Entrepreneur in you.

**On the occasion of National Science Day
SSI virtually presents**

**VIPLAV : Same Blood New Veins
February 28 - March 3, 2022**

About National Science Day

Every year on February 28, National Science Day (NSD) commemorates the discovery of the 'Raman Effect.' In 1986, the Indian government declared February 28 as National Science Day (NSD). Sir C.V. Raman announced the discovery of the 'Raman Effect' on this day in 1930, for which he was awarded the Nobel Prize. Theme-based science communication activities are held all around the country on this occasion. The theme for this year's National Science Day is "Integrated Approach in S&T for a Sustainable Future".

What is VIPLAV?

Viplav means a revolution in Sanskrit. Revolution represents a change, it is a passionate act of hope to bring about a positive change. It signifies the spirit of 'Same Blood New Veins' which characterizes the human urge to evolve and improve without losing the qualities which define us as human beings and remain connected to our roots.

This fest is inclined towards Integrated Approach in Science & Technology for a Sustainable Future with the objective to acknowledge the significance of statistics, science, and technology by expanding horizons for analytical, problem solving, and innovative thinking.

Objectives of VIPLAV:

1. To encourage innovation in the field of science and technology.
2. To display activities and achievements in the field of science for a sustainable future.
3. To discuss various issues and implement new technologies for the advancement in scientific understanding.
4. To widely spread awareness about the significance of scientific applications in daily life.
